

Quality and Environment Policy.

INDALMEC S.L. is a company specialized in:

Manufacture of steel structural equipment and its assemblies.

As a starting point for Quality and Environmental Management, in accordance with the criteria established in the ISO 9001:2015 and ISO 14001:2015 standards, integrating the policy constitutes a permanent and priority object whose purpose is Continuous Improvement. and decides to pursue with the necessary means the conformity of the Quality and Environment System with the pursuit of the satisfaction of our clients and interested parties, as well as the need to conserve and protect the Environment, and to prevent pollution, promote sustainable use of natural resources, with the desire to live in harmony with the environment that surrounds us, including these commitments within its business strategy.

INDALMEC S.L. complies with the legislation and regulations required in Quality processes, as well as environmental legislation and regulations, with the objectives of improvement in accordance with the new technologies that are within its reach, applying legal compliance to the activities that the company develops and to the requirements required by interested parties, complying even beyond the legal minimums in activities that are economically and technologically viable

The management of **INDALMEC S.L.** considers that establishing a culture of Quality and Environment is the fundamental factor in exercising adequate control over the continuous improvement policy, developing corrective and improvement actions necessary to avoid the reappearance of internal and external problems. The intention of our company is to achieve the highest competitiveness in the market, increase the satisfaction of interested parties, plan the actions that must be carried out to reduce the volume of waste generated in its activity, the obtaining of benefits in the company and the reduction of accidents and incidents.

The culture of **INDALMEC S.L.** considers that the Integrated Management System is not a matter of one person but is the result of joint work by all the members of our company, who must know and enforce all the quality, environmental and prevention rules that affect the work they do perform. Therefore, the Policy that we advocate for begins with the company's personnel, facilitating and encouraging adequate training for all its employees and a continuous improvement of its services so that they can satisfy the needs of the interested parties, the Coordination of Contractors and other Procedures.

The System will be reviewed by our company at least once a year, to verify that its effectiveness and adequacy are constantly maintained. This review will be completed through written support. The Company's Management undertakes to disclose its Policy and undertakes to enforce it and monitor its compliance throughout our company and as appropriate to its interested parties, as well as to comply with the integration in the environment to which it belongs. avoiding, within its technical and financial possibilities, the inconvenience that it could cause.
